Africa's New Tech Warriors

1 Some women in Africa have taken up a career in technology, a field normally
2 dominated **by** men. Naula Kebba had trained and worked as **an** accountant in
3 **1** Kampala in Uganda. But last year she decided she needed to learn about
4 technology to keep up with the pace of change in business.
5 "The world **is** much more demanding now," she said. "Everything now involves
6 technology." But 37-year-old Naula had no background in technology and
7 **there are** few places in Uganda that offer training in computer science. The
8 **2** answer lay in a six-month course on internet technology skills **at** the Uganda
9 Communications Institute.
10 Armed with **her** new knowledge, Naula has set up her own information
11 **3** technology consultancy. "It built up my confidence," said Naula. "I can deal with
12 technical problems myself instead of relying on someone else when something
13 goes wrong."
14 **She** was so encouraged by her training that she persuaded her sister and her
15 cousin to follow in her footsteps. Even her husband is considering whether he
16 should do the same. The course in internet technology is part of an international
17 education programme backed by the US tech giant Cisco Systems. It brings
18 together business, governments, international organisations and donors to
19 **4** promote technology skills in developing countries. The aim of the programme is
20 **to help** people in developing countries learn and improve their information
21 technology skills, with the hope of **reducing** the distance with industrialised
22 countries. There are now more than 90 academies in 32 developing countries,
23 with more than 2,500 students and nearly 500 graduates.
24 Julianne Susanne Sansa is an instructor at one of the 30 centres in Africa. She
25 **5** **started** working at the Institute of Computer Science in the Ugandan capital,
26 Kampala, 14 months ago. For her, it was like a dream coming true.
27 "This is something I have always wanted to do," said 34-year-old Julianne. "I
28 **6** have always had an interest in computers. People look up to you. It is a privilege
29 to do this job."
